

A Channel of Blessings

Transforming the world into a better place for everyone.

HOOD is a cryptocurrency token platform that allows people to invest and donate at the same time. It is the future of investment; we're not only focusing on individual gain, but also benefiting society. With HOOD, donation is made easier and more transparent, all from a dream to make a better world.

Problem

Today the social gap is happening everywhere and often it's beyond our control; as a result of natural disaster, disability, war and many other factors. It is something that could make people feel worthless, even when we know all humans are worthy.

Moreover, the definition of value has always been described through materials. People mostly seek investment that focuses more on the value of individual gain. At the same time, donation has always been perceived as something that is only for people who have already reached financial freedom.

We created HOOD to change this stereotype, to provide a place where everybody can do good and everyone can feel joy.

Solution

HOOD is offering future investment that is not only focusing on individual gain/profit, but also work for the benefit of others. The concept combines investing & donating at the same time.

In other words, every token holder who invest in HOOD will join forces to change the world to create a better place for everyone, because we believe that every good deed done together will have a great impact.

HOOD is made to be the platform for every philanthropist to donate in an easier and more transparent way.

We believe that everyone has the right to be happy and has the responsibility to share and care for one another. We are trying to make a platform with the power of cryptocurrency through Hood. As we know, cryptocurrency has changed the order of society's financial life today, with its stability and speed, also transparency in every transaction. HOOD wants to be innovating on the frontline. We have made a token that automatically separates 4% of sales for donation plus 3% for redistribution to all HOOD's token holders.

We use cryptocurrency as a powerful tool to distribute donations to those most in need, and with HOOD, we are trying hard to make that dream come true.

About Us

Our struggle to make HOOD a reality was not easy. It all began with our shock when we learnt that certain organizations, which we cannot mention by name, charge high fees (15–20%) when you donate money through their platforms.

Our story begins with the promise we made to make the world a better place. Our team decided to make that dreams come true with all their skill, strength, and their innovative ideas.

Our Road Map

- Having a presence on major social media
- Launch Website
- Influencer Marketing
- Presale
- Have \$HOOD listed on PancakeSwap

- Dessert Finance Audit
- CoinGecko Listing
- Cmc Listing
- More Influencer
- More Donation

- Community Voting for Next Donation Target
- Exchange Listing
- Continued Marketing Campaign
- Research and Development of additional uses for \$HOOD token More Donation

- Open Partnership Program
- Create our own charity media
- Listing on major exchange

Tokenomics

Supply

Initial token supply in the On BSC blockchain for lightning fast orders and minimal fees.

10% from total supply will be allocated for development, marketing, listing fee and other fees.

Transaction

4% is designated for donation, 1% for marketing, 1% to LP Pool and 3% is redistributed to all all holders proportionately.

Donations

Donation will be chosen based on polling system. We will have a few campaigns options to maximize the impact of HOOD community.

FAQ

How can investors trust that the Charity Wallet is locked and won't be rug pulled?

We know there's a lot of concern around this topic and we take that very seriously. We are making Charity Wallet transactions as transparent as possible through BSC Scan, so you can rest assured that HOOD funds are being allocated appropriately.

We are actively searching for a third-party company to manage the Charity Wallet for an extra level of security. Will HOOD's main focus always be on charities or will the project diversify?

HOOD has exciting plans for the future, but we are doing things one step at a time. We don't want to sacrifice quality for variety. Keeping the community up to date on any potential expansions is one of our priorities, so there will never be any surprises.

Who is on the HOOD team?

Andy, Daniel, Mike, and the countless volunteers who help bring this project to life.

Does the Hood team have any plans to reveal their identities?

It's something we are considering.
Some team members are more
comfortable with it than others, so we
haven 't settled on a plan just yet.
However, we believe showing you
results is far more important than
showing you our faces, so that' s what
we'll remain focused on.
